SunPass® Mini Sticker Transponder Shielding Instructions For Registered Hybrids and 3+ Carpools Using 95 Express Lanes

Please read these instructions carefully to properly install your transponder shield!

1. Install Your Mini Sticker in its Correct Position

Before installing the transponder shield, make sure your Mini Sticker transponder is installed as described in the instructions that came with it. Failure to position it in the proper place for your type of vehicle can result in operational failure.

2. Clean the Area Around Your Mini Sticker

Clean the windshield thoroughly on both sides of the Mini Sticker and allow to dry completely.

3. Peel Off the Plastic Backing From the Velcro® Strips

Peel off the opaque plastic backing from the Velcro.

4. Position and Install the Transponder Shield

Place the shield over the Mini Sticker so that the Velcro strips touch the left and right edges of it. (Take care so that the Velcro doesn't overlap the Mini Sticker.) When the shield is correctly attached, it will be centered over the Mini Sticker, completely covering it. Push firmly and hold for a few seconds to assure good adhesion.

5. Give the Velcro Adhesive Sufficient Time to Dry

It is recommended that you allow 24 hours for the adhesive to dry before removing the shield. If you don't have any travel planned on Florida's toll roads for the next 24 hours, you can leave the shield attached. (Remember, the shield can only be attached while on I-95's 95 Express lanes, according to requirements.)

If you do plan on travelling on Florida's toll roads within the next 24 hours, you are required to have tolls deducted from your SunPass account, so the shield must be removed! Allow the maximum drying time possible, and slowly and gently pull the shield away to assure that the two Velcro strips remain on the windshield, as shown above.

6. Removing and Storing the Shield

When not in use, grip the shield by its upper and lower or side flanges and remove for storage in your vehicle's glove compartment or console.

Please Remember!

- **Your SunPass account will not be billed for travel on 95 Express when your SunPass Mini Sticker transponder is shielded properly.**
- **Only registered 95 Express vehicles that are hybrids or meet the minimum occupancy requirements (3 or more people) may shield their SunPass Mini Sticker transponder.**
- **Failure to properly shield your SunPass Mini Sticker transponder while traveling as toll-exempt can result in the toll amount being deducted from your SunPass account.**
- **Law enforcement may issue traffic citations for illegally shielding your SunPass Mini Sticker transponder.**
